POTABLE/ NON POTABLE WATER PIPEWORK INSTALLED UNDERGROUND - PEAD
ISOLATION VALVES
HYPOTHETICAL IRRIGATION ZONING FROM NOT POTABLE PUMPING STATION
NOT POTABLE PUMP ROOM
NOT POTABLE WATER TANK 50m³
NOT POTABLE WATER PUMP
Water flow rate: 1.5 l/s
Pump head: 4.2 mH2o
NON POTABLE WATER PIPEWORK TO GANTRY AREA
VALVED PIT - MECHANICAL SET UP FOR IRRIGATION & YARD
MAIN COLD WATER PIPE FROM SITE DISTRIBUTION TO FIREFIGHTING TANK
FIREFIGHTING PRESSURIZATION TANK
COLD WATER AND NOT POTABLE WATER PIPES TO GUARDIAN ROOM WATER SYSTEM
FINAL POSITION OF THE MUNICIPAL WATER SUPPLY TO BE DEFINED
COLD WATER PIPES FOR DOMESTIC WATER DN50 AND FIRE FIGHTING DN80 FROM EXTERNAL MUNICIPAL SYSTEM
MAIN COLD WATER PIPE FROM SITE DISTRIBUTION TO BUILDING
NOT POTABLE WATER PIPE FROM SITE DISTRIBUTION TO BUILDING

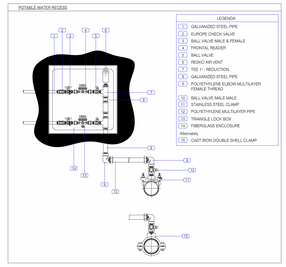
ENSURE PIPES TO CROSS AT 90°
ITEM REFERS TO TAG
NOTE: TOP OF DRAINAGE SYSTEM
ALLOW SPACE FOR THE INSULATION SYSTEM
ITEM OF DIAMETER TOP SIDE OUTSIDE, MUST BE YOUR AND OUTSIDE, MINIMAL



OTHER NOTES:

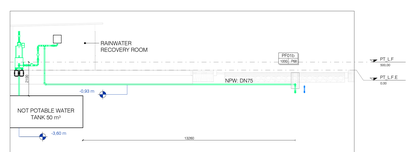
1. This set of drawings has been prepared to provide an overview of the external systems, with the understanding that the RIBA4 DIm project has not yet been finalized. As such, minor adjustments to the external networks may be required, particularly regarding their integration and coordination.
2. It is the responsibility of the General Contractor, during the RIBA5 design phase, to ensure that the systems are developed in accordance with the design intent outlined for the entire site. This includes alignment with the "CSA Drawings", "Telecom Design" and "Security Design" documents, ensuring that all elements are fully integrated in full compliance with the requirements and project needs defined in the RIBA4 design.

NOTE GENERALI:

1. Tutte le tubazioni del presente e-adds sono per il progetto di Discalmar
2. Per la corretta esecuzione dei lavori il fornitore/installatore è tenuto a prendere tutti gli elementi di progetto e grafici
3. Il fornitore/installatore è tenuto a verificare tutte le dimensioni e le quote di progetto, che vengono fissate in progettazione insieme ai progettisti.
4. Il fornitore/installatore è responsabile della corretta e soddisfacente esecuzione delle prestazioni richieste e segnala tutte le eventuali anomalie riscontrate.
5. Il progetto prevede tutte le tubazioni in PEAD, con giunzioni a saldatura testa a testa o con elettrosaldatura del tipo a manicotto incorporato.
6. Il progetto è stato sviluppato secondo una strategia antincendio. Le stesse sono state sviluppate in modo da garantire la sicurezza degli occupanti in caso di incendio. In ogni caso tutti gli attraversamenti di pareti e solai che costituiscono compartimentazione antincendio dovranno essere opportunamente sigillati/protetti in modo da garantire la resistenza al fuoco.
7. Il progetto potrà essere oggetto di revisioni a seguito di incontri con i progettisti e/o a seguito di richieste da parte della committenza.
8. Tutte le linee in cui potenziali sacche dei campionatori si abbiano per la DCL, dovranno essere realizzate con pendenza minima del 1%.
9. Tutte le volte che necessario nel definire a progetto potenziali rischi e/o pericoli di cantiere, ove sono state indicate specifiche attenzioni di tipo particolare, queste dovranno essere valutate dall'impresa esecutrice e dovranno essere messe in opera in modo da garantire la massima sicurezza in cantiere.
10. Si rimanda inoltre ai documenti specifici in fornitura delle apparecchiature e/o componenti per le caratteristiche tecniche e costruttive, le modalità di installazione, i limiti di impiego e ulteriori prescrizioni di carattere. In fornitura dei seguenti documenti:
11. L'esecutore mediante gli impianti indicati in oggetto e ad ogni ulteriore e più specifica prescrizione che potrà essere data dalla direzione lavori, dovrà realizzare, eseguire, compiere ed eseguire.

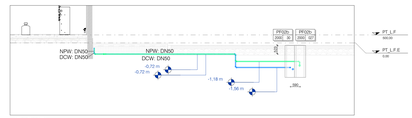
BUILDING NOTES:

1. The contractor is called up to the "Subject matter".
2. For the correct implementation of the drawing, it is necessary to read all project and design figures.
3. The project may undergo modifications of the design and drawings at various stages of the design, also at the request of the client, and these changes will be duly communicated.
4. The project has been developed following a fire safety strategy. The same have been developed in such a way as to guarantee the safety of the occupants in the event of a fire. In any case all the passages of walls and slabs that constitute fire compartmentation must be carefully sealed/protected in such a way as to guarantee the fire resistance to fire.
5. All pipes that are subject to potential sampling must be laid with a slope of not less than 1%.
6. Wherever necessary and within a project, the contractor is called upon to carry out concrete, and sole with reinforced steel attachment to build punctual and continuous foundations without the coordinated electrical/plant portrait.
7. The project may undergo modifications following design and / or at the request of the client, and these changes will be duly communicated.
8. The contractor is called upon to carry out the works in accordance with the project and with the technical specifications and drawings. Any changes must be communicated to the Client and the Design Team.
9. All fixtures and parts are to be accepted and delivered with the technical DP.
10. All fixtures, and the like mentioned in the design are for illustrative purposes only and may be subject to change.
11. All fixtures, and the like mentioned in the design are for illustrative purposes only and may be subject to change. The contractor is called upon to carry out the works in accordance with the project and with the technical specifications and drawings. Any changes must be communicated to the Client and the Design Team.
12. The contractor is called upon to carry out the works in accordance with the project and with the technical specifications and drawings. Any changes must be communicated to the Client and the Design Team.
13. The contractor is called upon to carry out the works in accordance with the project and with the technical specifications and drawings. Any changes must be communicated to the Client and the Design Team.
14. The contractor is called upon to carry out the works in accordance with the project and with the technical specifications and drawings. Any changes must be communicated to the Client and the Design Team.
15. The contractor is called upon to carry out the works in accordance with the project and with the technical specifications and drawings. Any changes must be communicated to the Client and the Design Team.
16. The contractor is called upon to carry out the works in accordance with the project and with the technical specifications and drawings. Any changes must be communicated to the Client and the Design Team.
17. The contractor is called upon to carry out the works in accordance with the project and with the technical specifications and drawings. Any changes must be communicated to the Client and the Design Team.
18. The contractor is called upon to carry out the works in accordance with the project and with the technical specifications and drawings. Any changes must be communicated to the Client and the Design Team.
19. The contractor is called upon to carry out the works in accordance with the project and with the technical specifications and drawings. Any changes must be communicated to the Client and the Design Team.
20. The contractor is called upon to carry out the works in accordance with the project and with the technical specifications and drawings. Any changes must be communicated to the Client and the Design Team.



Section A

1 : 100



Section B

1 : 100

The Level Key Plan shows the levels used for the design. The system dimensions refer to the external finished. All pipe bate heights refer to absolute height as distance from level
